

POST CODE : PMHN

Test Booklet Serial No.....

Name of Post: M.Sc Psychiatric (Mental Health) Nursing

Series : A

TEST BOOKLET

(Read the instruction carefully before starting to answer)

Time: 1 Hrs. : 30 Mins.

Max Marks: 100

No. of Questions: 100

1. Fill up the following information by Blue or Black ball point pen only:

Roll No.:

Name of the Candidate:

Name of Examination Centre:

Date of Examination :

Candidate's Signature :

Signature of Invigilator :

2. Open the seal of the booklet only when instructed to do so.
3. Don't start answering the questions until you are asked to do so.
4. Ensure that there are 100 Questions in the Test Booklet with four responses (A), (B), (C) and (D) of them only one is correct as the best answer to the question concerned.
5. There will be **NO NEGATIVE MARKING** for wrong answer. Each correct answer shall be awarded **1** mark.
6. Multiple answering of a question will cause the answer to be rejected.
7. Use only **Black or Blue Ball** pen for darkening appropriate circle completely.
For Example : **CORRECT METHOD** | **WRONG METHOD**

8. Rough work is to be done only on the Test Booklet and not on the answer sheet.
9. You are not allowed to use Mobile Phones, Smart Watches or any Electronic Device.
10. Make sure that you do not possess any pages (Blank or Printed) or any unauthorized material. If such material is found in your possession during the examination, you will be disqualified.
11. If you are found copying/helping others, you will be disqualified.
12. At the end of the examination hand over the answer sheet to the invigilator.
13. Do not leave the examination hall until you are asked to do so.
14. No candidate is allowed to leave the examination hall till the completion of examination.
15. The candidates are allowed to take the Test Booklet with them.
16. Smoking and eatables are not allowed inside the examination hall.

Series A**PMHN**

1. Which plane of section divides the body into anterior and posterior portions?
 - (A) Sagittal
 - (B) Transverse
 - (C) Coronal
 - (D) Midsagittal

2. How many bones does human ankle has?
 - (A) 6
 - (B) 7
 - (C) 8
 - (D) 9

3. What does corpus callosum connects in human brain?
 - (A) Two optic lobes
 - (B) Bone and muscle
 - (C) Two cerebral hemisphere
 - (D) Two lobes of pituitary gland

4. Human placenta is derived from :
 - (A) Amnion
 - (B) Chorion
 - (C) Allantois and chorion
 - (D) Allantois

Series A

PMHN

5. Which of the following organs is known as the ‘graveyard’ of RBCs?
 - (A) Spleen
 - (B) Kidney
 - (C) Liver
 - (D) Gall bladder

6. What is the temporary condition of altered consciousness where a patient’s perception becomes faint and unclear called?
 - (A) Somnolence
 - (B) Delirium
 - (C) Twilight
 - (D) Unconsciousness

7. A chronic ward patient with schizophrenia exhibits strange, stiff, and peculiar movements that seem bizarre.
 - (A) Tics
 - (B) Hyperactivity
 - (C) Mannerisms
 - (D) Stereotypial

8. What is the term for the condition in which a patient, during a psychiatric interview, persists with a group of ideas even after they are no longer relevant? For example: “Where do you live?” “London.” “How old are you?” “London.”
 - (A) Perseveration
 - (B) Mannerisms
 - (C) Ambitendence
 - (D) Echopraxia

9. Following admission of a mentally ill patient to the psychiatric unit, the nurse interviews family members, examines patient records, and conducts a physical assessment. Which phase of the nursing process does this represent?
- (A) Assessment
 - (B) Diagnosis
 - (C) Planning
 - (D) Implementation
10. In the SOAPIE documentation format, which category corresponds to the implementation step of the nursing process?
- (A) Subjective data (S)
 - (B) Assessment (A)
 - (C) Intervention (I)
 - (D) Evaluation
11. All of the following are essential requirement for a true experimental research **EXCEPT** :
- (A) Intervention
 - (B) Control
 - (C) Randomisation
 - (D) Random Sampling
12. Which of the following technique of snowball sampling is appropriate for recruiting a large sample?
- (A) Simple linear sampling
 - (B) Exponential non-discriminative sampling
 - (C) Exponential discriminative sampling
 - (D) Circular linear sampling

13. Predicative validity is a type of which of the following validity?
- (A) Content validity
 - (B) Construct validity
 - (C) Criterion validity
 - (D) Concurrent validity
14. In a greater than cumulative frequency distribution, frequencies of each class interval are?
- (A) Added successively from bottom to top
 - (B) Added successively from top to bottom
 - (C) Subtracted successively from bottom to top
 - (D) Subtracted successively from bottom to top
15. Innovation diffusion model was proposed by :
- (A) Stetler
 - (B) Roger
 - (C) Handerson
 - (D) Orem
16. Which of the following is **not** true for id?
- (A) It is based on pleasure principle
 - (B) It deals with our conscience
 - (C) It is present from birth
 - (D) It contains aggressive instinct

Series A**PMHN**

17. While assessing a client who is experiencing hypoglycemia, the nurse should expect to find :
- (A) Increased respiration
 - (B) Warm, dry skin
 - (C) Tachycardia
 - (D) Lethargy
18. After total hip replacement surgery the nurse should avoid placing the client in :
- (A) Supine position
 - (B) Lateral position
 - (C) Orthopneic position
 - (D) Semi-Fowler's position
19. A client with acute renal failure becomes confused and irritable. Duty nurse understand that this behavior may be caused by :
- (A) Hyperkalemia
 - (B) Hybernatriemia
 - (C) An elevated BUN
 - (D) Limited fluid intake
20. The type of hepatitis most frequently transmitted by transfusion is :
- (A) Hepatitis A
 - (B) Hepatitis B
 - (C) Hepatitis C
 - (D) Hepatitis D

Series A

PMHN

21. Which technique is most appropriate for the nurse to use when communicating with an angry patient?
- (A) Maintain a personal space
 - (B) Encourage safe coping behaviors
 - (C) Use therapeutic silence
 - (D) Use touch as a therapeutic technique
22. A patient with OCD reports needing to check his apartment door lock 25 times before leaving. The nurse understands this behavior is the patient's attempt to :
- (A) Call attention to himself
 - (B) Control his thoughts
 - (C) Maintain the safety of his home
 - (D) Reduce anxiety
23. What are the classic signs and symptoms of phobias?
- (A) Insomnia and an inability to concentrate
 - (B) Severe anxiety and fear
 - (C) Depression and weight loss
 - (D) Withdrawal and failure to distinguish reality from fantasy

Series A**PMHN**

24. A child shows deficits in communication and social interaction and engages in repetitive behaviors like arranging toys. Which disorder would the healthcare provider suspect?
- (A) Tourette disorder
 - (B) Attention deficit hyperactive disorder
 - (C) Intellectual developmental disorder
 - (D) Autism spectrum disorder
25. A patient with Alzheimer disease shows impaired reasoning. Which area of the brain does the healthcare provider suspect is affected?
- (A) Frontal lobe
 - (B) Hippocampus
 - (C) Amygdala
 - (D) Occipital Lobe
26. In the Johari Window, which area represents traits and behaviours that are known to the individual but unknown to others?
- (A) The Open Area
 - (B) The Blind Spot
 - (C) The Hidden Area
 - (D) The Unknown Area

27. E.G. Williamson is known as the chief proponent of which counselling approach?
- (A) Directive counselling
 - (B) Non-directive counselling
 - (C) Eclectic counselling
 - (D) Psychoanalytic counselling
28. A patient receiving external beam radiation therapy to the pelvis reports severe, frequent diarrhoea. Which of the following dietary modification should the oncology nurse recommend?
- (A) Increase intake of raw fruits and leafy green vegetables.
 - (B) Switch to a low-residue diet with small, frequent meal.
 - (C) Increase intake of high-fibre cereals.
 - (D) Drink plenty of carbonated beverages
29. Which of the following is considered a learner-centered method of teaching?
- (A) Lecture method
 - (B) Dictation
 - (C) Project method
 - (D) Drill and practice
30. “Critical Incident Analysis” is most useful in clinical teaching for?
- (A) Memorizing extensive lists of medical diagnoses
 - (B) Learning from unusual or challenging clinical experiences
 - (C) Avoiding complex and challenging patient cases
 - (D) Focusing exclusively on minor administrative incidents

31. Endogamy is a marriage in which:
- (A) Marriage within a specific caste, class or tribal group
 - (B) Marriage between one person of one gender and multiple of opposite gender
 - (C) Marriage outside the specific caste, class or group
 - (D) Marriage between two individuals of different social status
32. JHPIEGO is dedicated to developing affordable, innovative and hands on solutions to strengthen the health care services. Primary focus of JHPIEGO is:
- (A) Maternal and newborn health
 - (B) Adolescent health and maternal health
 - (C) Mental Health
 - (D) Geriatric health
33. After a breakup an adolescent started consuming alcohol with his friend. The nurse understand that the adolescent is adopting a :
- (A) Task oriented coping
 - (B) Maladaptive coping
 - (C) Defensive coping
 - (D) Problem focused coping

Series A**PMHN**

34. Ego defense mechanisms are protective strategies of ego. According to Freud, which one of the following is the highest level of ego defense :
- (A) Displacement
 - (B) Repression
 - (C) Projection
 - (D) Sublimation
35. The abnormal behaviour during sleep or the during transition between sleep and wakefulness are called :
- (A) Dyssomnias
 - (B) Insomnias
 - (C) Parasomnias
 - (D) Sleep latency
36. What does the term “downward drift” refer to in schizophrenia?
- (A) Falling to the bottom of the social ladder
 - (B) Become homeless
 - (C) Inability to hold down a job
 - (D) All of the above
37. Who first identified the disease historically known as dementia praecox?
- (A) Freud
 - (B) Beck
 - (C) Kraepelin
 - (D) Watson

Series A**PMHN**

38. What are hallucinations, delusions, disorganized speech, and catatonic behavior called in schizophrenia?
- (A) Negative symptoms
 - (B) Positive symptom
 - (C) Mediating symptoms
 - (D) Catastrophic symptoms
39. A newly married patient has delusions that his spouse is having an affair. What priority factor would indicate these delusions may become incapacitating?
- (A) He will be consumed by his thoughts
 - (B) He will predominantly be affected at work
 - (C) These beliefs will not have any effect on him
 - (D) These beliefs will affect his social Relationships
40. How should a nurse explain the dopamine hypothesis when teaching about schizophrenia causes?
- (A) The kidneys cause excessive amounts of dopamine in the body that the kidneys do not readily excrete
 - (B) There is an excess of dopamine found at the synaptic clefts in the brain
 - (C) Too little dopamine in the brain causes hallucinations
 - (D) Abnormal levels of dopamine cause structural brain abnormalities

PMHN

41. All of the following veins drains in to portal vein EXCEPT?
- (A) Superior mesenteric vein
 - (B) Renal vein
 - (C) Splenic vein
 - (D) Left gastric vein
42. Which hormone is secreted by the G cells of the stomach lining to stimulate parietal cells to release hydrochloric acid?
- (A) Secretin
 - (B) Gastrin
 - (C) Pepsin
 - (D) Cholecystokinin
43. Atrial Natriuretic Peptide is secreted by the heart in response to high blood pressure. Which of the following is it's physiological action?
- (A) Promote vasoconstriction
 - (B) Increase sodium and water excretion by the kidneys
 - (C) Retain sodium to increase blood volume through kidneys
 - (D) Stimulate the release of aldosterone
44. Which of the following connects muscle to bone?
- (A) Ligament
 - (B) Cartilage
 - (C) Tendon
 - (D) Bursa

45. Which of the following immunoglobulin is found in body secretions like tears, saliva, and breast milk?
- (A) IgG
 - (B) IgM
 - (C) IgA
 - (D) IgE
46. Theory of Interpersonal relation focuses on nurse patient relationship for therapeutic alliances. Who develop this theory :
- (A) Dorothea Dix
 - (B) Harriet Baily
 - (C) Hildegard Peplau
 - (D) Linda Richards
47. While washing the dishes after dinner, a glassware plate was slipped off and broke from Roma's hand. Roma thinks, "I am a totally incompetent person". What automatic thought does this statement represent?
- (A) Selective abstraction
 - (B) Magnification
 - (C) Minimization
 - (D) Personalization
48. The nurse prioritize the nursing diagnoses according to :
- (A) Degree of potential for resolution
 - (B) Client and family's request
 - (C) Life threatening potential
 - (D) Legal implications associated with the nursing interventions

49. Which of the following is not a characteristics of a profession?
- (A) Development of body of knowledge upon which skills rests
 - (B) Reservation of functions to the qualified by means of licensing bodies
 - (C) Competitions of better performance amongst practitioners
 - (D) Responsibilities toward the society through contribution of specialized skills
50. WHO recognizes burn out as an occupational phenomenon. Which one of the following statement is true for describing Burn out?
- (A) Withdrawal from pleasurable activities due to stress
 - (B) Extreme tiredness due to excessive physical exertion
 - (C) Inability to perform work because of anxiety
 - (D) Physical and psychological exhaustion caused by inability to cope
51. A patient with chronic back pain needs an increased dose of opioid medication to obtain pain relief. The healthcare provider attributes this to which phenomenon?
- (A) Tolerance
 - (B) Addiction
 - (C) Pseudoaddiction
 - (D) Dependence

52. In which year did the Indian Mental Health Act (IMHA) come into force across all states and union territories of India?
- (A) April 1993
 - (B) March 1993
 - (C) May 1993
 - (D) June 1993
53. A 20-year-old patient voluntarily approaches the psychiatric OPD and requests admission for treatment. This type of admission is known as what?
- (A) Involuntary Admission
 - (B) voluntary Admission
 - (C) Admission under special circumstance
 - (D) Admission in emergency
54. Which chapter of the Mental Healthcare Act deals with the protection of human rights of persons with mental illness?
- (A) Chapter VI
 - (B) Chapter VII
 - (C) Chapter VIII
 - (D) Chapter IX
55. In which year did the Narcotic Drugs and Psychotropic Substances Act (NDPS Act) come into force?
- (A) 16-09-1985
 - (B) 16-09-1986
 - (C) 16-09-1987
 - (D) 16-09-1988

56. Which of the following electrolyte imbalance is most dangerous for cardiac function?
- (A) Sodium imbalance
 - (B) Potassium imbalance
 - (C) Chloride imbalance
 - (D) Calcium imbalance
57. Which of the following is an example of primary prevention?
- (A) Early diagnosis of cancer
 - (B) Physiotherapy after stroke
 - (C) Rehabilitation after fracture
 - (D) Immunization
58. While assessing the wound healing of a patient the nurse understands that the correct order of wound healing is?
- (A) Haemostasis, inflammation, proliferation, remodelling
 - (B) Inflammation Haemostasis, , proliferation, remodelling
 - (C) Proliferation, remodelling, Haemostasis, inflammation
 - (D) Remodelling, proliferation, haemostasis, inflammation
59. A Diabetic patient asks to the nurse about the best indicator for long term blood glucose control. The nurse responds that it is?
- (A) HbA1c
 - (B) Urine sugar
 - (C) SGOT
 - (D) Blood urea

Series A**PMHN**

60. At what rate should chest compressions be delivered during adult CPR?
- (A) 60 to 80 compressions per minute
 - (B) 80 to 100 compressions per minute
 - (C) 100 to 120 compressions per minute
 - (D) 120 to 140 compressions per minutes
61. Following all are techniques that enhance data collection, except :
- (A) Interpretation
 - (B) Confrontation
 - (C) Summary
 - (D) Expressing value judgment
62. The nurse researcher uses random sampling to select participants. What is the key benefit of this method?
- (A) Easier data collection
 - (B) More reliable statistical analysis
 - (C) Reduces selection bias
 - (D) Involves fewer participants
63. In nursing research, what is the term for a possible explanation or prediction that can be tested?
- (A) Theory
 - (B) Hypothesis
 - (C) Variable
 - (D) Concept

Series A

PMHN

64. A community nurse must be aware that the first choice for Diarrhea in an infant is :
- (A) ORS
 - (B) Salt water
 - (C) Sugar mixed in water
 - (D) Dextrose
65. The following are the key features of Kangaroo Mother Care (KMC), except :
- (A) Skin-to-skin contact between mother and baby
 - (B) Exclusive breast feeding
 - (C) Indicated for babies with cyanosis
 - (D) Initiated in a facility and continued at home
66. Name the umbrella body in West Bengal that coordinates over a dozen mental health NGOs.
- (A) Paripurnata
 - (B) Sanjeevani
 - (C) Maithri
 - (D) SCARF
67. Who first introduced the practice of including family members in psychiatric treatment?
- (A) Dr. Kennedy
 - (B) Freud
 - (C) Dr. Vidyasagar
 - (D) Kohler

Series A**PMHN**

68. Identify the disorder from the list that resolves on its own without specific treatment.
- (A) Postnatal depression
 - (B) Postnatal Blues
 - (C) Postnatal psychosis
 - (D) Postnatal anxiety disorders
69. What is the definition of a halfway home in psychiatric rehabilitation?
- (A) Located within the hospital campus wherein patients take care of themselves
 - (B) Transitory residential centers to integrate the individual into main stream of life
 - (C) Innovative alternative to hospitalization with only day treatment program
 - (D) Located within the campus to reduce the disability of the patient
70. A patient presents with pervasive distrust, suspicion, and hypersensitivity to criticism. What is the likely personality disorder?
- (A) Paranoid
 - (B) Schizoid
 - (C) Schizotypal
 - (D) Antisocial

71. According to Sigmund Freud's psychoanalytic theory, which of the following component of the personality operates strictly on the "pleasure principle"?
- (A) Ego
 - (B) Id
 - (C) Superego
 - (D) Ego Ideal

- (A) Histrionic personality disorder
 - (B) Narcissistic personality disorder
 - (C) Dependent personality disorder
 - (D) Pessimistic personality disorder

74. A patient is taking Monoamine Oxidase Inhibitors medicine. The nurse should instruct the patient to avoid strictly all of the following food items **EXCEPT** :

- (A) Salami
- (B) Marmite
- (C) Cheddar
- (D) Cottage cheese

75. Under Section 115 of the Mental Healthcare Act, 2017, how the act of attempting suicide is treated?

- (A) It is a punishable offense under the Indian Penal Code
- (B) It is punishable with a fine but no imprisonment
- (C) It results in mandatory institutionalization
- (D) It is decriminalized, presuming the person was under severe stress

76. A nurse instructs a pregnant woman for urine specimen for hCG. Which one of the following she should advised to the pregnant woman -

- (A) Mid stream collection
- (B) Suprapubic puncture
- (C) Catheterisation
- (D) Early morning sample

77. Endometriosis is characterized by :
- (A) Amenorrhea and insomnia
 - (B) Ecchymosis and Petechiae
 - (C) Painful menstruation and backache
 - (D) Early osteoporosis and pelvic inflammation
78. In the CCU patient has a sudden cardiac arrest. The style of leadership most appropriate in this situation is:
- (A) Autocratic
 - (B) Democratic
 - (C) Laissez-faire.
 - (D) Emotional
79. Nursing audit refers :
- (A) Assessment of the quality of nursing services
 - (B) Find out the cost expenditure of nursing care.
 - (C) To maintain the supply inventory
 - (D) Analyze the cost of nursing procedure
80. The crude death rate is :
- (A) Number of death per 1000 population in 10 years
 - (B) Number of death per 1000 population in 1 years
 - (C) Number of death per 1000 estimated midyear population in one year
 - (D) None of these

81. Which of the following describes the condition of ongoing or repeated delay in, or lack of, orgasm after typical sexual arousal that results in significant distress or relationship problems for the person?
- (A) Erectile Disorder
 - (B) Aclimactic Disorder
 - (C) Female Orgasmic Disorder
 - (D) Female Climactic Disorder
82. A 50-year-old female patient is sent by her primary care physician due to depression. In the interview, she struggles to express her feelings verbally. This phenomenon is BEST termed :
- (A) Ambivalence
 - (B) Affective flattening
 - (C) Alogia
 - (D) Anhedonia
83. Mr. Samul, a nursing officer, is obtaining the patient's history. A comment made by the patient causes the nurse to consider depression.
- (A) "My daughter said she's not coming to visit today because she needs to work late."

 - (D) Rationalizing the termination, saying that "everything comes to an end"
86. Which of the following criteria is used as a clinical gold standard to differentiate whether a plural effusion is a exudate or transudate?
- (A) Light's Criteria
 - (B) Jone's Criteria
 - (C) Duke's Criteria
 - (D) Framingham's Criteria

87. The supreme court of India in a landmark decision related to health care has permitted for?
- (A) Active euthanasia
 - (B) Passive euthanasia
 - (C) Either active or passive euthanasia depending on condition of patient
 - (D) Neither active nor passive euthanasia
88. The nurse is preparing a teaching plan for a patient who is scheduled for urea breath test. She should include the following instructions in her teaching plan **EXCEPT** :
- (A) The test is done to detect presence of S. Aureus in your stomach
 - (B) You will be given a capsule of carbon-labelled urea to ingest
 - (C) A breath sample will be obtained 10-20 minute after the ingestion of capsule
 - (D) Avoid Ranitidine 24 hours before the test
89. When a person is experiencing loss but cannot openly acknowledge or share publicly. Which type of grief the person is experiencing?
- (A) Disenfranchised grief
 - (B) Masked grief
 - (C) Chronic grief
 - (D) Delayed grief
90. A nurse is auscultating bowel sound of a patient. She heard 5 to 6 sounds in less than 30 seconds. What is the character of the bowel sounds?
- (A) Normal
 - (B) Hyperactive
 - (C) Borborygmi
 - (D) Hypoactive

Series A

PMHN

91. Nursing Leadership is an act of :
- (A) Demanding
 - (B) Influencing
 - (C) Manipulating
 - (D) Pressurizing
92. Quality and quantity of rendered nursing care is basically evaluated from :
- (A) Punctuality of the nurse
 - (B) Knowledge of the nurse
 - (C) Record of the patient
 - (D) Health status of the patient
93. A nurse has been asked to inject a depot. Antipsychotic in a community extension camp. Which one of the following the nurse would select :
- (A) Lorazepam
 - (B) Fluphenazine deconate
 - (C) Phenargan
 - (D) Chlorpromazine
94. Which Indian Law de-criminalized Suicide?
- (A) Indian Lunacy Act
 - (B) Mental Health Act
 - (C) Mental Healthcare Act
 - (D) Consumer Protection Act

95. Clear chain of authority streamlines accountability. This principle of management is known as :
- (A) Centralization
 - (B) Esprit de Corps
 - (C) Division of work
 - (D) Unity of command
96. Propranolol (Inderal) is utilized in mental health settings to treat which of the following conditions?
- (A) Antipsychotic-induced akathisia and anxiety
 - (B) The manic phase of bipolar illness as a mood stabilizer
 - (C) Delusions for patients suffering from schizophrenia
 - (D) Obsessive-compulsive disorder (OCD) to reduce ritualistic behaviour
97. A patient with chronic undifferentiated schizophrenia is admitted to the psychiatric unit of a local hospital. Over the next several days, the patient is observed laughing, yelling, and talking to herself. This behavior is characteristic of :
- (A) Delusion
